

THE ART OF BOY KONG

June 07, 2016

[Boy Kong](#) is a self-taught painter, illustrator, muralist, and collage artist whose neon-candy-colored works combine the angular sensibility of cubist masters with the contemporary fluidity of Japanese prints and freshness of urban graffiti.

Based in Orlando, Florida, [Boy Kong](#) is inspired by a mixture of Ukiyo-e, Surrealism, Graffiti, and animal folklore. Kong's visual style juxtaposes these elements with a mastery of color and rhythmic application. In short time his body of work has become immediately identifiable without succumbing to a signature aesthetic. Kong divides his time between Orlando and NYC. He is represented by Gitler & _____ in New York.
